

Skin Joy Clinic

SKIN | HAIR | NAIL CLINIC

Hello there! 🌹 ✨

Hello, beautiful! We've just restored some youthful volume and contour to your face at SkinJoyClinic. Fillers are an art, and now it's time to protect the masterpiece while it sets.

🎮 The "Sculpt & Settle" Quest 🏠

Fillers need a little time to "marry" with your tissues. Let's help them:

- Rule 1: The "Hands Off" Policy 🚫 No touching, pressing, or massaging the treated area for at least 48 hours. We want the filler to stay exactly where we put it!
- Rule 2: The Ice Age ❄️ If you have some swelling, apply a cool compress gently for 10 minutes every hour. It helps the swelling go down and prevents bruising.
- Rule 3: The Sleeping Beauty 🛌 Try to sleep on your back for the next 2 nights. Avoid "smooching" your face into the pillow!

🏆 Reward: Perfectly contoured, natural-looking volume and a fresh, rested appearance!

🧠 Fun Fact!

Most fillers are made of Hyaluronic Acid, a sugar molecule that already exists in your body! It can hold up to 1,000 times its weight in water, which is why your results look so plump and hydrated.

🚫 Urgent Support:

Bruising is normal. However, if you see the skin turning pale/grey or if you experience severe, increasing pain, contact us immediately.
