SKIN | HAIR | NAIL CLINIC

Hello there!

Time to reveal that sharp jawline! Today at SkinJoyClinic, we've targeted those stubborn fat cells under the chin. You're on your way to a more sculpted, confident profile.

The "Sculpted Success" Quest

The treatment area is going to be quite "busy" for the next few days. Here is the plan:

- **Level 1: The Swell is Real**  Expect "bullfrog" swelling for the first 3-5 days. This is actually a GOOD sign—it means the treatment is working to break down the fat!
- **Level 2: The Comfort Cool**  Use a cold compress gently to manage any discomfort or swelling. Avoid heat in this area for 48 hours.
- **Level 3: The Patience Protocol**  Results aren't instant! Your body needs to "flush away" the treated fat cells. You'll start to see the real magic in 4-6 weeks.

 **Reward:** A defined, sharp, and youthful jawline that lasts!

Fun Fact!

Once those fat cells are destroyed, they are gone for good! As long as you maintain a stable weight, your new jawline will remain your best feature.

Check-in with Team SkinJoy:

Numbness or firm nodules are common. However, if you notice an uneven smile or difficulty swallowing, please contact us right away.
