

Skin Joy Clinic

SKIN | HAIR | NAIL CLINIC

Hello there!

You've just upgraded your hair game with Growth Factor Concentrate (GFC) at SkinJoyClinic! This is a highly concentrated version of your own body's healing power, designed to wake up those sleepy follicles.

The "Growth Factor Gauntlet"

Your scalp is now a high-intensity healing zone. Let's keep it that way:

- Level 1: The 24-Hour Halo  Keep your hair dry and untouched for 24 hours. No hats, no helmets, and definitely no washing!
- Level 2: The Exercise Embargo  Skip the gym for 24-48 hours. Sweating can irritate the injection sites and we want your body focusing all its energy on your hair roots.
- Level 3: The "No-Heat" Streak  Avoid using hair dryers, straighteners, or curling irons for the next 3 days. Your scalp prefers a cool, calm environment right now.

 Reward: Maximum hair regrowth and a noticeable boost in hair volume!

Fun Fact!

GFC is like PRP's older, stronger sibling. While PRP contains platelets, GFC is a pure concentrate of *only* the growth factors, meaning there's less inflammation and more "fuel" for your hair!

Check-in with the Team:

Tiny pin-prick scabs or mild tenderness is expected. If you see yellow crusting, experience a fever, or if the pain gets worse after the first day, call us!
