

Skin Joy Clinic

SKIN | HAIR | NAIL CLINIC

Hello there! 🩸 ✨

Your hair just got a dose of "Liquid Gold"! We've harvested your body's own healing platelets at SkinJoyClinic and placed them right where they can do the most good. Let's help those roots revive!

🎮 The "Root Revival" Race 🏁

The platelets are starting their repair work. Here is how you can help them cross the finish line:

- **Quest 1: The Washing Wait** 🚿 Wait at least 12-24 hours before washing your hair. When you do wash, use a very gentle, pH-balanced shampoo and lukewarm water.
- **Quest 2: The Medication Guard** 💊 For the next 3 days, avoid anti-inflammatory meds (like Aspirin or Ibuprofen) unless prescribed, as they can interfere with the natural "healing spark" we just started!
- **Quest 3: The Scalp Sanctuary** 🧢 Protect your scalp from the sun and dust. If you must go out, a loose-fitting clean hat is a great way to earn +20 protection points!

🏆 **Reward:** Revitalized follicles and a significant reduction in hair thinning!

🧠 Did You Know?

PRP works by "tricking" your hair follicles into thinking there's a tiny injury that needs fixing. This triggers a massive surge of blood flow and repair cells to the area!

🛑 When to call for backup:

A "tight" feeling or mild swelling on the scalp is totally normal. If you experience a severe headache that won't go away, or if the injection sites look infected, reach out!
