SKIN | HAIR | NAIL CLINIC

## Hello there! 🦻 💎

We've just finished repairing your earlobe at SkinJoyClinic! You're on the path to being able to wear your favorite earrings again (eventually!). Let's make sure those stitches do their job perfectly.

### 🎮 The "Perfect Stitch" Quest 🧵

Earlobes have a great blood supply and heal fast, but they need your help:

- **Quest 1: The Dry Zone** 🚿 Keep your earlobes completely dry for the first 48 hours. When you wash your hair, be extra careful or use a shower cap!
- **Quest 2: The Antibiotic Armor** 💧 Apply a tiny dab of the prescribed ointment to the front and back of the stitch line with a clean Q-tip twice a day.
- **Quest 3: The Waiting Game** ⌚ This is the hard part! No earrings (not even small ones) for the next 6-8 weeks. Putting weight on the lobe too soon can cause it to split again!

🏆 **Reward: Strong, beautiful earlobes ready for a new look!**

### 🧠 Did You Know?

The earlobe is one of the few places on the body that can be "re-sculpted" to look almost exactly like it did before it was stretched or split!

### 📞 Call Team SkinJoy If:

You notice excessive swelling, yellow discharge, or if a stitch feels like it has come loose.
